Miss Lendormi was thirty years old and ived with her parents. She was for fifeen years employed by the C. B. Cones Company, and was one of the prime movers in organizing the Garment Makers' Union of this city, and of which she was financial secretary. Her career in organized labor was one seldom taken by women, and in the last few years she became quite prominent in labor circles. She had been treasurer of Central Labor Union about four years, each time being elected by acclamation. In the recent organization of the Women's Label League she was one of the most active workers and was financial secretary of that organization. Her activity and popularity in the field of organized labor gained her appointment as a delegate to the last meeting of the State Federation of Labor by Central Labor Union. Floral designs offered by the women with whom she worked in the factory, where she had charge of one of the departments, filled her accustomed place yesterday, and -morrow afternoon the factory will be losed in her honor. We often hear women say it is so hard to keep help, the reason for which is that society women have a contempt for household work-a contempt for the work they hire others to do. If I were to ask work they would laugh at the idea and perhaps say with their lips that they did not dislike it and abstain from saying they had a contempt for it. However, it is only the American women that have. I have studied history since I was a little girl. and in what little traveling I have done have noticed that there is a more general ignorance of the scientific basis of house hold labor among us than in any other country. One reason is that our education has been all intellectual, and as a result we have an educational system many features of which we are very proud of and other features of which we are not proud. Our system recognizes only the mind, and until it recognizes the body also it will be imperfect.

"Until every school is surrounded by a big yard and until every school is pro-vided with a gymnasium and the outdoor teacher, just as other studies are, the system of education has not made proper provision for the body, which should be taught as well as the mind. * * From my point of view the only thing for women to do is to show a proper respect for labor. I often have mothers whose daughters attend my school say: 'My daughters will never have to do anything,' meaning, perhaps, that their daughters did not need this or that branch of education, as they never would have to work for a livelihood whereas in other countries the daugh-ters of the aristocratic class are the ones who receive the highest education. * * * When we have a contempt for work we cannot expect others to have a respect for it. I have often thought how strange it is that girls without homes work in and out of that pay for food and board, when they might receive the same amount and have a refined home. Is it the fault of the girls or is it our fault? We have schooled them to that preference because servants and ourselves. In other countries the servants have an association with the family and have their rights. Why is it so many of our young married people go boarding or take a flat, when there used give up independence because a house needs thought and care, whereas every-thing is provided in the modern flat. It is a deplorable condition.'
